Architectural Registration Boards
Denver AEC Roundtable

registration

Colorado

Brandon is involved in a variety of projects from high-end hospitality to mixed-use development and multi-family housing. He is well versed in all phases of pre-construction, design development, construction documentation and construction administration.

As a detail focused team member, Brandon places emphasis on the integration of advancements in materials, construction and software to the design process. He also practices an informed integration of new technologies within the architectural design platform—leading the practice to a better built environment and more efficient designs.

By heading up the direction, implementation, and management of the firm's technology advancements, Brandon has successfully integrated numerous technological processes including BIM (Building Information Modeling), 3D rendering, office data management and digital delivery processes.
