

SnowCloud at Bachelor Gulch

This 54-unit whole ownership condominium is the first of three buildings creating the base village for the Bachelor Gulch ski area. Inspired by the great lodges of the National Park Systems, the building utilizes a heavy timber/log structure with stone veneer and large local boulders. Layered shingles, ship lap siding and wood shake roofing add indigenous texture. SnowCloud sets the design guidelines for the village.

The units are wholly-owned. The mix includes four-bedroom units on the top level and one, two and three-bedroom units on the remaining floors. A communal lounge with a welcoming hearth serves all owners for apres-ski gathering or social relaxation.

SnowCloud at Bachelor Gulch
